

## Hira Cellvit Mist

A multivitamin herbal complex consisting of vitamins A, E, F, H (biotin) B8 (inositol), horse chestnut extract and natural plant humectants and AHA's. Biochemical and clinical observations show that a synergistic effect is achieved by a combination of various vitamins and herbs improving overall effectiveness.

### Uses:

- This non-oily liquid may be sprayed directly onto cleansed skin in the morning as a moisture and vitamin base under makeup.
- This product may be sprayed onto the face during the day to freshen and moisturise the skin exposed to the dry environment of an air-conditioned office.
- It is an ideal freshener and moisturiser that can be applied during vigorous outdoor exercise, or for use at horse events over your makeup etc.
- May be sprayed over your makeup during air travel.
- May be sprayed onto cleansed face at night to 'feed' the skin, followed by Hira Cellvit-C.
- Particularly suitable for teenage skins to balance sebum production.
- May be used as an all over moisture mist for scaly dry skin on arms and legs.
- Hira Cellvit Mist may also be used as an after shave skin conditioner for men. You may notice that after application the skin will have a slightly moist feel. This is the anti-oxidant moisture barrier.

### Benefits

- Is intended for application on skin with under or over active sebaceous glands
- Vitamin A counteracts skin cornification stimulates sebum gland secretion without increasing it above normal.
- Vitamin E improves circulation of blood which improves connective tissue strength
- Vitamin F ( complex of essential fatty acids) helps rehydrate scaly dry skin.
- Vitamin H(biotin) is necessary for the renewal of tissue and for the correct composition of the sebaceous gland.
- Vitamin B8 important for cell respiration.
- Horse-Chestnut extract improves blood flow to skin and decreases capillary permeation.
- Acts as a humectant
- Provides a moisture barrier.
- For application to skins poorly supplied with blood.
